Services marked "included" may incur a service charge if the technical requirements exceed an implementation time much greater than an average implementation time. This occurs due to irregular configurations/dependencies a website may have which increases the scope of work beyond generalized estimates which dictate pricing for plans we offer.

*Why did IQS increase the cost to host a WordPress website?

In response to the growing number of attacks on WordPress websites, IQS will be offering web hosting services for WordPress websites only on dedicated individual cloud server environments that have advanced security systems specifically designed for WordPress software, automated backup systems, and downtime monitoring. This server environment is a large upgrade from the shared server environment IQS offered over the years, and existing clients who have WordPress websites will need to decide on one of the two new plans below before June 1st, 2021 which is when we will discontinue the shared server for WordPress.

Third Party SSL Certificates

We also offer SSL Certificate issuing and installation services, if your current web host does not offer this service.

SSL Certificate	Frequency	Cost
Sectigo DV Certificate	annual	\$15/year

Email Hosting

Below is a chart to share details of our email hosting services. We have expanded our email system providers to give our clients additional choices.
